Structural features and treatment basis

1 Heat treatment. The instrument produces a temperature range from 40 to 60°C, for which there are three adjustable knob to control low, medium and warm Heating. The heating will dilate blood capillaries, sweat pores and ducts, and oil glands This will increase blood circulation and enable movement of herbal molecules deep into the target tissue.

2 Electro - magnetic treatment. The instrument produces a desired magnetic field suitable for energy (chi) movement in the body meridian. It enhance the receptiveness of the herbal molecules and treatment process.

3 Chinese herbal treatment. More than 30 types of Chinese herbs are used and packaged into 6 combinations; A, B, C, D, O and X for or different diseases,. The herbs are refined, magnetized and dissolved scientifically in special solvent and medium. This is a high -tech preparation in order to produce the desired effect of penetrative herbal therapy.

4 Infrared irradiation. This will produce a treatment radiation of 8 μ m to 14 μ m wavelengths suitable to increase blood circulation. It also enhance the effect of herbal molecular movement through the dermal layer into the target organ or tissue.

Illness to be treated

Hypertension, cerebral arteriosclerosis, gastroenteritis, enlargement of prostate gland, dysmenorrhea, putrescence of caput femoris, protrusion of the intervertebral disc, cervical spondylopathy(neck pain),rheumatoid arthritis,lumbago,diabetes,emphysema, bronchitis facial palsy, neurasthenia, periartthritis of the shoulder, hyperosteogeny. pneumonia, excessive phlegm, retarding cancerous and benign growth of tumors.

I am looking forward to hearing from you.

Yours

Mark Xing
